Source Alignment and RAG Retrieval Note

Sections 1 to 17 of this Markdown file reproduce the controlled PDF glossary content in clean text format for indexing. The official document code, title, department, owner, status, effective date, review date, terminology sections, definitions, responsibilities, references, revision history, and approval table are preserved from the PDF source.

The additional material added for the AI Assistant appears only after section 17 under Appendix A. That appendix is a retrieval supplement intended to help the RAG answer conceptual questions such as "what is", "what does it mean", "explain", "define", "que es", or "que significa". It must not replace the controlled glossary definitions.

For formal layout, signatures, and controlled distribution evidence, use the PDF version of BSF-CORP-002. For clean text retrieval and AI indexing, use this Markdown version, because it contains the PDF content plus the marked retrieval supplement.

1. Purpose

This glossary establishes the official terminology used throughout BlueSea Foods corporate documentation, internal systems, training materials, operational records, and the BlueSea AI Assistant knowledge base.

Its purpose is to:

- promote consistent language across departments;
- reduce ambiguity in policies, procedures, manuals, and records;
- support reliable document classification and retrieval;
- improve the quality of answers generated by the BlueSea AI Assistant;
- provide common definitions for food safety, quality, operations, HSE, technology, and compliance concepts.

2. Scope

This glossary applies to all BlueSea Foods departments and to all official documents classified as Public, Internal, Confidential, or Restricted.

It must be followed when creating or updating:

- corporate policies;
- procedures and work instructions;
- training materials;
- forms and registers;
- operational and quality records;
- technical manuals;
- internal communications;
- knowledge base content;
- BlueSea AI Assistant source documents.

When a term is defined in a specific legal requirement, certification scheme, contract, or technical standard, the official external definition takes precedence.

3. Corporate Terms

Official Term	Definition
BlueSea Foods	Fictional seafood processing and export company headquartered in Paita, Piura, Peru.
BlueSea AI Assistant	Corporate knowledge assistant that answers employee questions using approved internal documents.
Employee	Person hired by BlueSea Foods under a valid employment relationship.
Contractor	External person or company authorized to perform services for BlueSea Foods.
Visitor	Person temporarily admitted to a BlueSea Foods facility who is not an employee or contractor assigned to regular duties.
Department	Formal organizational unit responsible for a defined business function.
Document Owner	Role responsible for the accuracy, approval, maintenance, and review of a document.
Approver	Authorized role that confirms a document may be issued as official.
Corporate Document	Official information issued under the BlueSea Foods document control system.
Active Document	Approved and current document authorized for operational use.
Obsolete Document	Document replaced by a newer approved version and no longer authorized for current use.
Controlled Copy	Official copy subject to version and distribution control.
Uncontrolled Copy	Copy provided for reference whose current status must be verified before use.
Internal Use	Information available to all BlueSea Foods employees but not intended for public distribution.
Confidential Information	Information available only to specifically authorized personnel.

Official Term	Definition
Processing Plant	BlueSea Foods facility where seafood is received, inspected, processed, packed, stored, and prepared for dispatch.
Corporate Headquarters	Main administrative office of BlueSea Foods in Paita, Piura, Peru.
Coastal Community	Community located near BlueSea Foods operations or supply activities.
Business Continuity	Capability to continue or restore critical operations after a disruption.
Continuous Improvement	Ongoing effort to improve processes, products, services, controls, and performance.

4. Food Safety Terms

Official Term	Definition
Food Safety	Assurance that food will not cause harm when prepared or consumed as intended.
Food Safety Hazard	Biological, chemical, physical, or allergenic agent with the potential to cause harm.
HACCP	Systematic approach used to identify, evaluate, and control significant food safety hazards.
Hazard Analysis	Process used to identify hazards and determine which require control.
Critical Control Point (CCP)	Step at which control is essential to prevent, eliminate, or reduce a significant food safety hazard to an acceptable level.
Critical Limit	Measurable boundary that separates acceptable from unacceptable conditions at a CCP.
Monitoring	Planned observations or measurements used to determine whether a control measure is operating as intended.

Official Term	Definition
Verification	Activities used to confirm that food safety controls and systems operate effectively.
Validation	Evidence that a control measure or combination of measures is capable of controlling the identified hazard.
Corrective Action	Action taken to restore control and address the cause and consequences of a deviation.
Deviation	Failure to meet an established limit, criterion, specification, or requirement.
Cross-Contamination	Transfer of hazards from one product, surface, person, or environment to another.
Allergen Cross-Contact	Unintended transfer of an allergenic substance to a product that should not contain it.
Good Manufacturing Practices (GMP)	Basic operational and environmental conditions required to produce safe food.
Sanitation	Cleaning and disinfection activities intended to maintain hygienic conditions.
Cleaning	Removal of soil, residues, and unwanted material from surfaces or equipment.
Disinfection	Reduction of microorganisms to an acceptable level using approved methods.
Potable Water	Water suitable for human consumption and food processing use.
Product Hold	Controlled status preventing the use or dispatch of a product until a decision is made.
Product Release	Formal authorization allowing a product to proceed to storage, sale, or dispatch.
Product Recall	Coordinated action to remove unsafe or noncompliant product from the supply chain.
Withdrawal	Removal of product for reasons that may not involve a direct food safety risk.

Official Term	Definition
Traceability	Ability to follow the movement and history of a product, ingredient, lot, or material through defined stages.
Mass Balance	Verification that input and output quantities are logically consistent within a traceability period.
Food Defense	Measures designed to protect food from intentional contamination or tampering.
Food Fraud	Intentional deception for economic gain involving food, ingredients, packaging, or documentation.
Vulnerability Assessment	Evaluation of exposure to food fraud risks.
Threat Assessment	Evaluation of intentional threats to products, people, facilities, or supply chain security.
Shelf Life	Period during which a product remains safe and meets defined quality requirements under specified conditions.
Organoleptic Evaluation	Assessment using sensory characteristics such as appearance, odor, texture, and color.
Microbiological Criteria	Defined limits used to assess the microbiological acceptability of a product, process, or environment.

5. Quality Management Terms

Official Term	Definition
Quality	Degree to which a product, process, or service meets defined requirements.
Quality Management System (QMS)	Coordinated framework used to establish, control, monitor, and improve quality processes.
Quality Assurance (QA)	Planned activities that provide confidence that quality and food safety requirements will be met.

Official Term	Definition
Quality Control (QC)	Inspection, testing, and monitoring activities used to verify compliance with specifications.
Specification	Documented requirement for a product, material, process, or service.
Nonconformity	Failure to meet a specified requirement.
Observation	Finding that does not constitute a nonconformity but may identify an improvement opportunity.
Root Cause	Underlying reason a problem or nonconformity occurred.
Correction	Immediate action taken to eliminate a detected problem.
Corrective Action	Action taken to eliminate the cause of a detected nonconformity and prevent recurrence.
Preventive Action	Action taken to reduce the likelihood of a potential nonconformity.
CAPA	Structured corrective and preventive action process.
Internal Audit	Systematic and independent evaluation conducted by or on behalf of BlueSea Foods.
External Audit	Evaluation conducted by a customer, certification body, regulator, or other external party.
Audit Finding	Result obtained by comparing audit evidence against defined criteria.
Major Nonconformity	Serious failure that may affect system integrity, product safety, legality, or certification status.
Minor Nonconformity	Isolated failure that does not indicate a complete system breakdown.
Calibration	Comparison and adjustment of measuring equipment against a recognized reference.
Verification of Equipment	Confirmation that measuring or monitoring equipment performs as required.

Official Term	Definition
Measurement Uncertainty	Estimated range within which a measured value may reasonably lie.
Key Performance Indicator (KPI)	Quantifiable measure used to evaluate performance against objectives.
Quality Objective	Measurable result established to support the quality policy.
Management Review	Formal evaluation by management of system suitability, adequacy, effectiveness, and improvement needs.
Document Control	Process used to approve, issue, revise, distribute, and archive controlled documents.
Record	Evidence of an activity performed or result achieved.
Retention Period	Required length of time a record must be maintained.
Change Control	Formal process used to evaluate, approve, implement, and document changes.

6. Health, Safety and Environment Terms

Official Term	Definition
HSE	Health, Safety and Environment.
Occupational Safety	Protection of employees and contractors from work-related injury or harm.
Occupational Health	Protection and promotion of physical and mental wellbeing in relation to work.
Environmental Management	Control of activities that may affect air, water, soil, biodiversity, or natural resources.
Personal Protective Equipment (PPE)	Equipment worn to reduce exposure to workplace hazards.

Official Term	Definition
Hazard	Source, situation, or act with potential to cause injury, illness, environmental damage, or property loss.
Risk	Combination of the likelihood and consequence of a hazardous event.
Risk Assessment	Process used to identify hazards, evaluate risks, and define controls.
Incident	Work-related event that caused or could have caused injury, illness, damage, or environmental impact.
Accident	Incident that results in injury, illness, damage, loss, or environmental impact.
Near Miss	Incident that did not cause harm but had the potential to do so.
Unsafe Act	Behavior that increases the likelihood of an incident.
Unsafe Condition	Workplace condition that increases the likelihood of an incident.
First Aid	Immediate basic assistance given to an injured or ill person before professional medical care.
Emergency	Unplanned situation requiring immediate coordinated response.
Evacuation	Organized movement of people from a hazardous area to a safe location.
Assembly Point	Designated safe location where evacuated personnel gather and are accounted for.
Emergency Coordinator	Person authorized to direct emergency response activities.
Permit to Work	Formal authorization for specified high-risk work under defined controls.
Lockout/Tagout (LOTO)	Method used to isolate hazardous energy before maintenance or intervention.
Confined Space	Space with restricted entry or exit that may contain serious safety or atmospheric hazards.

Official Term	Definition
Environmental Aspect	Element of an activity, product, or service that can interact with the environment.
Environmental Impact	Change to the environment caused wholly or partly by an activity, product, or service.
Spill	Uncontrolled release of a substance into the workplace or environment.
Waste Segregation	Separation of waste by defined category for safe handling, recycling, or disposal.

7. Operations Terms

Official Term	Definition
Seafood Reception	Controlled process for receiving seafood raw material at the processing plant.
Receiving Inspection	Verification of condition, temperature, documentation, identity, and compliance at reception.
Raw Material	Seafood or ingredient received for processing.
Lot	Defined quantity of product produced, received, or handled under similar conditions and identified by a unique code.
Batch	Quantity processed during a defined production period under common conditions.
Lot Number	Unique identifier used to support traceability.
Vessel	Authorized fishing craft supplying seafood raw material.
Landing Site	Approved location where seafood is unloaded from a vessel.
Supplier	Approved organization or person providing seafood, materials, equipment, or services.
Approved Supplier	Supplier evaluated and authorized under BlueSea Foods requirements.

Official Term	Definition
Processing Line	Sequence of operations and equipment used to transform raw material into finished product.
Sorting	Separation of seafood by species, size, grade, or quality condition.
Grading	Classification according to defined commercial or quality criteria.
Filleting	Cutting operation used to separate fish flesh from bones and other parts.
Packing	Placement of product into approved primary or secondary packaging.
Labeling	Application of required product identification and regulatory information.
Cold Chain	Temperature-controlled handling from reception through processing, storage, transport, and delivery.
Chilled Product	Product maintained above its freezing point within a defined low-temperature range.
Frozen Product	Product maintained at or below its specified frozen storage temperature.
Cold Storage	Temperature-controlled area used to preserve chilled or frozen products.
Blast Freezer	Equipment that rapidly lowers product temperature using high-velocity cold air.
Freezing Tunnel	Controlled system through which product passes for rapid freezing.
Temperature Excursion	Exposure outside an established temperature range.
Dispatch	Controlled release and shipment of finished product from the facility.
Export Shipment	Product consignment prepared for international transport.
Shipping Order	Authorized instruction defining product, quantity, destination, and shipment conditions.
Container Inspection	Security and condition check performed before loading an export container.
Seal Number	Unique identifier of the security seal applied to a container or transport unit.
Yield	Ratio between usable finished product and raw material input.

Official Term	Definition
Rework	Product or material processed again under controlled and approved conditions.
Downtime	Period during which equipment or a production line is unavailable.

8. Commercial, Finance and Procurement Terms

Official Term	Definition
Customer	Organization or person purchasing BlueSea Foods products or services.
Sales Order	Internal record of a confirmed customer order.
Purchase Order	Formal authorization issued to a supplier for goods or services.
Quotation	Commercial proposal that includes product, price, quantity, and applicable conditions.
Contract	Binding agreement between BlueSea Foods and another party.
Incoterm	International commercial term defining responsibilities between buyer and seller.
Invoice	Commercial document stating products or services supplied and amount payable.
Credit Note	Document used to reduce or correct an invoiced amount.
Budget	Approved financial plan for a defined period or activity.
Expense Reimbursement	Repayment of authorized business expenses supported by required evidence.
Petty Cash	Limited fund used for minor authorized expenses.
Approved Vendor	Supplier authorized for purchasing after evaluation and approval.
Procurement	Process of sourcing, evaluating, purchasing, and managing goods and services.

Official Term	Definition
Lead Time	Time between request or order placement and delivery.
Payment Terms	Agreed schedule and conditions for payment.

9. Information Technology Terms

Official Term	Definition
BlueERP	Internal enterprise resource planning system used for finance, procurement, inventory, and operations data.
BlueHR	Human Resources platform used for employee records, attendance, leave, and benefits.
BlueQuality	Quality management platform used for audits, nonconformities, CAPA, and quality records.
BlueTrack	Internal system used for seafood reception, lot creation, traceability, and product movement.
BlueDocs	Corporate document management platform used for controlled documents and records.
BlueSupport	Internal service desk platform used to report and track technology requests and incidents.
User Account	Unique digital identity assigned to an authorized user.
Access Permission	Authorization defining which systems, records, or actions a user may access.
Single Sign-On (SSO)	Authentication method that allows access to multiple systems using one approved identity.
Multi-Factor Authentication (MFA)	Authentication requiring more than one verification factor.
Virtual Private Network (VPN)	Secure connection used to access corporate resources remotely.

Official Term	Definition
Cybersecurity Incident	Event that may compromise confidentiality, integrity, or availability of information or systems.
Data Backup	Protected copy of information used for recovery.
Restore	Process of recovering data or systems from a backup.
System Downtime	Period during which a system is unavailable.
Service Request	Formal request for support, access, equipment, or system assistance.
Incident Ticket	Record created to track an unplanned interruption or system problem.
Master Data	Controlled reference data used consistently across systems.
Audit Trail	Chronological record of user actions, changes, or transactions in a system.
Role-Based Access Control (RBAC)	Access method that assigns permissions according to job role.

10. Compliance and Certification Terms

Official Term	Definition
ISO 9001	Quality management system standard used to support consistent processes, customer focus, risk-based thinking, and continual improvement.
HACCP	Preventive food safety methodology based on hazard analysis and control of significant hazards.
BRCGS Food Safety	Certification framework used to assess food safety, quality, legality, and operational controls in food manufacturing.
IFS Food	Food safety and quality assessment standard commonly used for manufacturers supplying retailer and branded food products.

Official Term	Definition
MSC Chain of Custody	Traceability certification framework intended to maintain the identity of eligible seafood through the supply chain.
BASC	Supply chain security framework focused on secure international trade and prevention of illicit activities.
SMETA	Ethical trade audit methodology covering labor, health and safety, environment, and business ethics.
Certification Body	Independent organization authorized to conduct certification audits and issue certification decisions.
Certification Audit	External assessment used to determine conformity with a certification scheme.
Surveillance Audit	Periodic audit conducted to verify continued compliance between certification cycles.
Recertification Audit	Comprehensive assessment conducted before certification renewal.
Scope of Certification	Products, processes, activities, and sites covered by a certificate.
Regulatory Compliance	Adherence to applicable laws, regulations, permits, and official requirements.
Legal Register	Controlled list of applicable legal and regulatory obligations.
Ethical Trade	Business practices that respect labor rights, workplace conditions, environment, and integrity.
Chain of Custody	Documented control of product identity and movement from source through processing and distribution.
Social Compliance	Conformity with labor, human rights, health and safety, and ethical workplace requirements.
Supply Chain Security	Measures used to protect cargo, facilities, information, and international trade processes.
Sustainability	Responsible use of environmental, social, and economic resources to support long-term value.

Note: Certification descriptions in this fictional document are simplified for internal orientation. Official scheme documents and applicable legal requirements must be consulted for formal interpretation.

11. Approved Acronyms

Acronym	Meaning
AI	Artificial Intelligence
BASC	Business Alliance for Secure Commerce
BRCGS	BRCGS Food Safety
CAPA	Corrective and Preventive Action
CCP	Critical Control Point
ERP	Enterprise Resource Planning
FIFO	First In, First Out
FEFO	First Expired, First Out
GMP	Good Manufacturing Practices
HACCP	Hazard Analysis and Critical Control Points
HR	Human Resources
HSE	Health, Safety and Environment
IFS	International Featured Standards
IT	Information Technology
KPI	Key Performance Indicator
LOTO	Lockout/Tagout
MFA	Multi-Factor Authentication
MSC	Marine Stewardship Council
PPE	Personal Protective Equipment

Acronym	Meaning
QA	Quality Assurance
QC	Quality Control
QMS	Quality Management System
RBAC	Role-Based Access Control
SMETA	Sedex Members Ethical Trade Audit
SOP	Standard Operating Procedure
SSO	Single Sign-On
VPN	Virtual Private Network

12. Preferred Terminology

Use	Avoid
Employee	Worker, laborer
Processing Plant	Factory
Supervisor	Boss
Incident	Problem
Near Miss	Almost accident
Vessel	Boat
Seafood Reception	Fish delivery
Raw Material	Fish input
Cold Storage	Freezer room
Processing Line	Production belt
Personal Protective Equipment	Safety gear, safety equipment
Corrective Action	Fix

Use	Avoid
Nonconformity	Error, failure
Product Hold	Blocked product
Traceability	Tracking only
Document Owner	Document person
Approved Supplier	Regular supplier
BlueTrack	Catch system
BlueDocs	Document folder
Service Request	IT message
Assembly Point	Meeting place
Export Shipment	Export load
Finished Product	Final fish
Food Safety Hazard	Risky material
Cleaning and Disinfection	Cleanup

13. Terminology Usage Rules

1. Use the official term the first time a concept appears in a document.
2. Place the approved acronym in parentheses after the full term when appropriate.
3. Use the acronym consistently after it has been introduced.
4. Avoid creating local abbreviations that are not included in this glossary.
5. Do not use informal terms in controlled documents.
6. Use one term for one concept across all departments.
7. Where legal or certification terminology differs, cite the applicable source.
8. Definitions must remain understandable to employees from different departments.
9. Technical terms used only by specialists should include a brief explanation.
10. New terms must be reviewed by the document owner before being added to this glossary.

14. Responsibilities

Corporate Affairs Manager

- maintain this glossary;
- coordinate terminology updates;
- ensure alignment with the Corporate Document Standard;
- approve terminology used in corporate communications.

Department Managers

- identify new technical or operational terms;
- ensure departmental documents use approved terminology;
- request updates when definitions change.

Quality Assurance Manager

- review terminology related to food safety, quality, audits, and certification;
- ensure definitions remain consistent with approved internal systems.

IT Manager

- review system names, cybersecurity terms, and technical terminology;
- ensure the BlueSea AI Assistant uses approved system names.

Document Authors

- consult this glossary during document preparation;
- avoid unapproved synonyms and informal language;
- flag unclear or missing terms before publication.

Appendix A. Quick Answers for AI Retrieval

What is HACCP?

HACCP means Hazard Analysis and Critical Control Points. It is a preventive food safety system used to identify, evaluate, and control significant hazards that could affect product safety. At BlueSea Foods, HACCP supports safe reception, processing, freezing, storage, dispatch, traceability, corrective action, and product release.

Related documents: BSF-QMS-005; BSF-OPS-005.

What is the cold chain?

The cold chain is the temperature-controlled handling of seafood from reception through processing, storage, transport, and delivery. It helps preserve food safety, freshness, product quality, and compliance by preventing uncontrolled warming, thawing, refreezing, or temperature abuse.

Related documents: BSF-OPS-005; BSF-IT-004.

What is freezing?

Freezing is the controlled process of lowering seafood temperature so the product reaches and maintains its approved frozen condition. Freezing requirements depend on the product specification, HACCP plan, customer requirement, legal requirement, and approved technical instruction.

Related documents: BSF-OPS-005; BSF-QMS-005.

What is Temperature Status?

Temperature Status is the classification used to show whether a recorded temperature is acceptable, near a limit, or outside the approved range. It helps Operations and Quality Assurance decide whether monitoring, review, product hold, or corrective action is required.

Related documents: BSF-OPS-005; BSF-IT-004.

What is BlueTrack?

BlueTrack is the internal system used by BlueSea Foods for seafood reception, lot creation, traceability, cold chain records, product movement, alerts, and operational reporting.

Related documents: BSF-IT-001; BSF-IT-004.

What is login or system access?

Login is the process by which an authorized user enters a corporate system using an approved identity, password, and any required single sign-on or multi-factor authentication. System access is granted only after business need, approval, and role-based permissions are confirmed.

Related documents: BSF-IT-004; BSF-IT-003.

What are Password and Session Rules?

Password and Session Rules are requirements for protecting accounts during system use. Users must keep passwords confidential, avoid sharing accounts, lock screens when away, log out of shared workstations, avoid saving passwords in shared browsers, and report suspicious login activity immediately.

Related documents: BSF-IT-004; BSF-IT-003.

What is employee leave?

Employee leave is approved time away from work under applicable law, employment terms, and company policy. Leave may include annual leave, sick leave, emergency leave, family-related leave, or other approved absence types.

Related documents: BSF-HR-002; BSF-HR-003; BSF-HR-004.

What is a workplace grievance?

A workplace grievance is a concern raised by an employee about work conditions, treatment, conduct, pay, schedule, policy application, or another employment-related matter. It should be reported through Human Resources, the supervisor, manager, or another approved channel.

Related documents: BSF-HR-004; BSF-CORP-006.

What is compliance?

Compliance means following applicable laws, regulations, permits, certifications, contracts, policies, ethical rules, and internal procedures. At BlueSea Foods, compliance includes food safety, labor, privacy, anti-bribery, supply chain security, environmental, and customer requirements.

Related documents: BSF-LEGAL-001; BSF-CORP-006.

What is data privacy?

Data privacy is the responsible and lawful handling of personal data. Personal data includes information that identifies or can reasonably be linked to an individual, such as employee records, payroll data, identification documents, contact details, and access logs.

Related documents: BSF-LEGAL-001; BSF-IT-003.

What is confidential information?

Confidential information is non-public information whose unauthorized disclosure could harm BlueSea Foods, employees, customers, suppliers, or business partners. It may include customer requirements, quality results, employee data, commercial terms, security details, legal matters, and controlled internal documents.

Related documents: BSF-IT-003; BSF-LEGAL-001; BSF-CORP-006.
