1. Purpose

This document shows how organizational knowledge is structured, classified, maintained and connected across BlueSea Foods. This document is the conceptual model used by the BlueSea AI Assistant to locate reliable information.

2. Scope

This document applies to every controlled document, dataset, procedure, manual, register, guide, presentation and knowledge asset managed by BlueSea Foods, including information consumed by the BlueSea AI Assistant.

3. Definitions

Term	Definition
Knowledge Asset	Approved source of corporate information
Knowledge Domain	Functional area grouping related information
Knowledge Map	Representation of relationships between corporate information assets
Knowledge Owner	Role responsible for maintaining an information asset
Knowledge Consumer	Employee or system using approved information

4. Knowledge Architecture

The corporate knowledge is organized into seven domains:

- Corporate
- Human Resources
- HSE
- Operations
- Quality & Certifications
- Information Technology
- Document Governance

5. Knowledge Taxonomy

Level	Description
Corporate	Vision, policies, governance
Department	Functional documentation
Process	Procedures and workflows

Evidence	Forms, datasets and reports

6. Knowledge Relationships

7. Decision-Making Authority

- 1. Create
- 2. Review

3. Approve
4. Publish
5. Use
6. Maintain
7. Archive
8. Retire

8. AI Knowledge Sources

The BlueSea AI Assistant shall prioritize:

1. Policies
2. Standards
3. Procedures
4. Work Instructions
5. Registers
6. Approved reference documents

Obsolete or superseded documents shall never be indexed.

9. Metadata Requirements

Every document shall include:

- Document ID
- Department
- Owner
- Version
- Status
- Effective Date
- Review Date
- Confidentiality
- Language
- Keywords

10. Responsibilities

Corporate Affairs Manager

- Maintain the corporate knowledge structure.
- Coordinate taxonomy updates.
- Approve structural changes.

Department Managers

- Maintain knowledge within their domains.
- Review document quality.
- Ensure document relationships remain current.

Information Technology

- Maintain BlueDocs and AI repositories.
- Protect knowledge assets.

11. Governance

Knowledge quality is monitored through:

- Internal audits
- Annual document reviews
- Metadata validation
- AI response quality reviews
- Certification audits
