Document Title	Corporate Document Standard
Department	Corporate Affairs
Owner	Corporate Affairs Manager

Field	Value
Approver	General Manager
Version	1.0
Status	Active
Effective Date	July 1, 2026
Review Date	July 1, 2027
Confidentiality	Internal

1. Purpose

This standard defines the rules for creating, identifying, reviewing, approving, issuing, revising, distributing, storing, retrieving, protecting, retaining, and archiving BlueSea Foods corporate documents and records.

Its objectives are to:

- ensure that employees use current and approved information;
- maintain consistent document structure and terminology;
- support regulatory, customer, certification, and business requirements;
- improve document retrieval and knowledge management;
- protect confidential and restricted information;
- define responsibilities for document ownership and approval;
- support the BlueSea AI Assistant with reliable and controlled source content.

2. Scope

This standard applies to all BlueSea Foods departments, sites, systems, employees, contractors, and approved external service providers who create, review, approve, use, store, or manage corporate information.

It applies to policies, manuals, procedures, work instructions, guides, forms, registers, reports, presentations, spreadsheets, databases, web pages, training materials, knowledge base content, and documents used by the BlueSea AI Assistant.

3. Corporate Terms

Term	Definition
Controlled Document	Approved document managed under formal version, access, review, and distribution controls.
Record	Evidence of an activity performed, decision made, result achieved, or transaction completed.
Master Copy	Official source version maintained in the approved document repository.
Document Metadata	Structured information used to identify, classify, search, and manage a document.
Review Cycle	Defined period between formal reviews of an active document.
Superseded Version	Previous version replaced by a newer approved version.
External Document	Information issued by an external authority, customer, supplier, certification body, or manufacturer.
Knowledge Source	Approved document or dataset used by the BlueSea AI Assistant.

4. Document Hierarchy

Level	Document Type	Purpose
Level 1	Corporate Policy / Corporate Profile	Defines strategic commitments and high-level direction.
Level 2	Manual / Standard	Defines management system structure and requirements.
Level 3	Procedure / Guide	Defines responsibilities, process steps, and controls.
Level 4	Work Instruction	Provides detailed task-level instructions.
Level 5	Form / Register / Checklist	Captures required operational data and evidence.
Level 6	Record / Report / Dataset	Provides evidence of completed activities or results.
Level 7	Reference Document	Provides supporting external or internal information.

5. Document Identification

The standard structure is:

BSF-[DEPARTMENT]-[SEQUENCE]

Where:

- **BSF** identifies BlueSea Foods;
- **DEPARTMENT** identifies the responsible area;
- **SEQUENCE** is a three-digit number.

Approved Department Codes

Code	Department or Category
CORP	Corporate Affairs
DOC-STD	Corporate Document Standards
HR	Human Resources
HSE	Health, Safety and Environment
OPS	Operations
QMS	Quality Management System
IT	Information Technology
INV	Document Inventory and Governance

File Naming Convention

[Document ID]_[Document Title]_[Version].[extension]

Example:

BSF-HSE-001_Workplace_Safety_Procedure_v1.0.docx

6. Required Metadata

Required Field	Description
Document ID	Unique document identifier
Document Title	Official title
Department	Responsible department

Required Field	Description
Owner	Role responsible for the document
Approver	Authorized approving role
Version	Current approved version
Status	Draft, Under Review, Active, Superseded, Obsolete, or Archived
Effective Date	Date the document becomes valid
Review Date	Planned formal review date
Confidentiality	Public, Internal, Confidential, or Restricted
Language	Primary language
Keywords	Search and retrieval terms

7. Operations Terms

Controlled documents should use these sections when applicable:

1. Title and metadata
2. Educational disclaimer
3. Document control
4. Purpose
5. Scope
6. Definitions
7. Requirements or procedure
8. Records
9. Monitoring and compliance

- 10. Responsibilities
- 11. References
- 12. Revision history
- 13. Approval

8. Header Standard

The header of each rendered document must include:

Left	Center	Right
Full Color BlueSea Foods logo	Department and corporate slogan	Document ID, version, and status

9. Footer Standard

The footer must include:

Left	Center	Right
BLUESEA FOODS confidentiality classification	Document ID version	Page number in the format: Page X of Y © 2026 BlueSea Foods

10. Formatting Requirements

Documents must:

- use clear and professional language;
- follow the Corporate Glossary;
- use consistent heading levels;
- use readable fonts;
- use tables when they improve clarity;
- use numbered steps for sequential activities;
- identify applicable forms and records;
- avoid informal abbreviations;
- use accessible color contrast.

The default corporate document language is English.

Dates must use **July 1, 2026** in narrative text and **2026-07-01** in tables and systems.

Version numbers follow this format:

- **1.0** for the initial approved release;
- **1.1** for minor changes;
- **2.0** for major revisions.

11. Document Status

Status	Meaning
Draft	Being prepared and not authorized for operational use
Under Review	Being evaluated by designated reviewers
Active	Approved and authorized for use
Superseded	Replaced by a newer approved version
Obsolete	No longer applicable or authorized for use
Archived	Retained for historical, legal, or evidentiary purposes

12. Responsibilities

Document Owner

- ensure technical accuracy;
- coordinate preparation and review;
- confirm compliance with applicable requirements;
- define access and confidentiality;
- initiate periodic reviews;
- request revision or withdrawal when necessary.

Document Author

- use the approved template;
- apply the correct document ID and metadata;
- use approved terminology;

- identify relevant references;
- address reviewer comments.

Reviewer

- assess technical content;
- verify process alignment;
- identify risks, gaps, and inconsistencies;
- confirm that references and responsibilities are correct.

Approver

- confirm that the document is suitable for official issue;
- verify that required reviews were completed;
- authorize the effective date;
- approve the confidentiality classification.

Document Control Administrator

- maintain the official repository;
- assign or validate document IDs;
- publish approved versions;
- control access and distribution;
- archive superseded versions;
- update the Document Inventory.

13. Document Creation and Approval Process

1. Identify the need for a new or revised document.
2. Confirm the responsible department and owner.
3. Assign or validate the document ID.
4. Prepare the draft using the approved structure.
5. Complete metadata and references.
6. Conduct technical and cross-functional review.
7. Resolve review comments.
8. Obtain formal approval.
9. Assign the effective date.
10. Publish the master copy in the approved repository.
11. Communicate the document to affected users.
12. Update the Document Inventory.
13. Include the document in the BlueSea AI Assistant ingestion plan when applicable.

14. Review and Revision

Active documents must be reviewed at least annually unless a different period is justified.

A review must also occur when legal, certification, customer, process, product, system, or organizational requirements change.

15. Change Control

All revisions must be documented in the Revision History.

Major revisions require a new whole version number. Minor editorial or clarification changes may use a decimal version.

Unapproved changes to active documents are prohibited.

16. Distribution and Access

Controlled documents must be distributed through approved channels such as BlueDocs, BlueQuality, BlueHR, BlueTrack, or another authorized repository.

Printed copies are considered uncontrolled unless specifically marked as controlled.

17. Confidentiality Classification

Classification	Access
Public	Approved for public distribution
Internal	Available to authorized BlueSea Foods personnel
Confidential	Limited to defined roles or department
Restricted	Strictly limited to specifically authorized individuals

18. External Document Control

External documents that affect BlueSea Foods operations must be identified, evaluated for applicability, assigned an owner, reviewed for updates, and protected against unintended use of outdated versions.

Examples include:

- laws and regulations;
- ISO standards;
- HACCP guidance;
- BRCGS Food Safety requirements;
- IFS Food requirements;

- MSC Chain of Custody requirements;
- BASC requirements;
- SMETA guidance;
- customer specifications;
- supplier certificates;
- equipment manuals.

19. Records Management

Records must be:

- legible;
- identifiable;
- traceable;
- protected from loss, damage, alteration, or unauthorized access;
- stored in approved locations;
- retained for the defined period;
- disposed of securely.

20. Document Retention

Document or Record Type	Minimum Retention
Active corporate documents	Current version plus superseded versions
Food safety records	Shelf life plus 12 months, or longer if required
Traceability records	At least 3 years
Training records	Employment period plus 3 years
Audit and CAPA records	At least 5 years

Document or Record Type	Minimum Retention
HSE incident records	At least 5 years or legal requirement
Financial records	At least 10 years or legal requirement
Certification records	Current certification cycle plus 3 years

21. Obsolete Documents

When a document becomes obsolete:

1. change the status to Obsolete or Archived;
2. prevent operational use;
3. retain the superseded version when required;
4. remove or clearly mark printed controlled copies;
5. update related references;
6. update the Document Inventory;
7. remove obsolete content from the BlueSea AI Assistant source index.

22. Document Repository

BlueDocs is the preferred corporate repository.

Other approved systems may include:

- BlueQuality;
- BlueHR;
- BlueTrack;
- BlueERP;

- BlueSupport.

Personal drives, local folders, messaging applications, and email inboxes must not be treated as official repositories.

23. BlueSea AI Assistant Requirements

Documents intended for ingestion must:

- have an Active status;
- include complete metadata;
- use approved terminology;
- contain a clear title and section structure;
- identify confidentiality and access restrictions;
- be reviewed for accuracy and duplication;
- exclude obsolete information;
- follow BSF-INV-004;
- be included in BSF-INV-003.

24. Compliance Monitoring

Compliance may be monitored through:

- document inventory reviews;
- internal audits;
- certification audits;
- system access reviews;
- periodic owner reviews;
- metadata completeness checks;
- obsolete document checks;

- knowledge base quality reviews.

25. Exceptions

Exceptions must be documented, justified, risk-assessed, approved, periodically reviewed, and withdrawn when no longer necessary.
